

FOX STUDIOS BAJA

U.S. MEDICAL RESOURCES

To back-up on-site medical personnel, production companies shooting at Fox Studios Baja have previously entered into agreements with *Sharp Health Care International Services* located in San Diego. Within their network of medical facilities, they represent *Sharp Chula Vista Hospital*, minutes from the border and the closest U.S. trauma center; *Grossmont Hospital* in San Diego, which has a fully-staffed re compression chamber and *Sharp's Rees Stealy Occupational Health Facility* for non-emergency medical needs. You will have access to Sharp facilities 24-hours a day; access to *Care Medical Transportation Ambulance Service* and *The Bi-national Emergency Medical Care Committee*, a non-profit corporation dedicated to evacuate Americans to the U.S. if they become sick or injured while in Mexico.

NOTE: Since a seriously ill or injured person being evacuated across the border may not have his or her passport or I.D. on hand, we strongly recommend that you place a label on the back of all your studio I.D. badges containing each person's number. Also include the name and number of your Sharp contact with a note that he/she can be called "for serious medical emergencies when not on the studio lot".
